

Valid Manufacturing specializes in parking lot design including pedestals, distribution and controllers. Our team of engineers and designers will work with you to design the most effective and efficient solution for your requirements. We have a full range of pedestals and distribution enclosures. If you don't see a standard design in our catalogue we have a full range of manufacturing capabilities in-house to create a product for your specifications.

Parking lot distribution is available in post, pole or pad mount with the size dependent on number of circuits, interrupt rating and optional equipment. Custom powder coat colours are available with the standard being ASA 61 grey.
